Pole Construction

Adding balloons to your column!

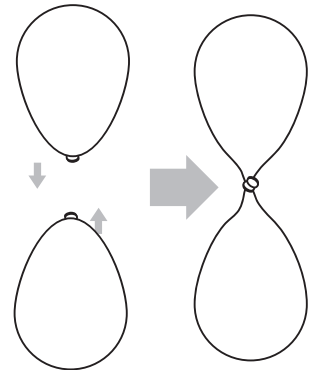

STEP 1:

Tie two inflated 11 inch balloons together at the bottom.

Repeat STEP 1 until all balloons have been tied.

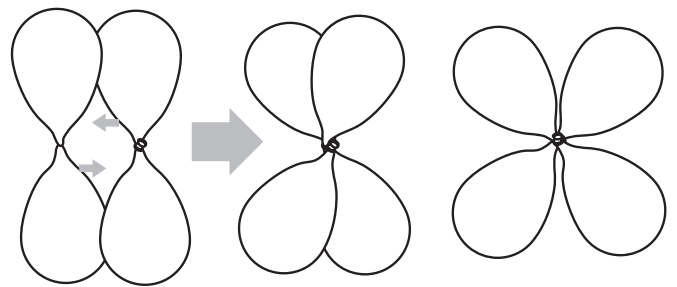

HELPFUL HINT:

- Be patient during this process. It may take quite a while to complete.

STEP 2:

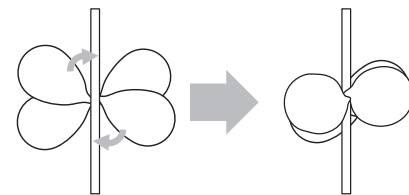

Combine two pairs of tied balloons in the middle by crossing them.

STEP 3:

Push the set of 4 balloons onto the pole. Once the center of the balloons reaches the pole, twist the two balloons that are wrapped around the pole, locking the balloons in place. Then gently slide the balloons down to the bottom of the column.

AS SEEN FROM SIDE

STEP 4:

Repeat STEP 3 with the next set of balloons, adjusting it to fit almost between the previous set of balloons. This will fill in any openings found on the column.

Repeat STEP 4 until all the sets of balloons are used on the column.
